Front panel model RCS-8xl

Rear panel models RCS-8 and RCS-8xl

Discover the RCS-8

The RCS series devices are single-box, 8-channel remote control solutions. They include nearly every function of our entire Remote Facilities Controller product line in a flexible, easy-to-use system.

RCS series systems combine:

- the functionality and voice connectivity of the RFC-1 Remote Facilities Controller
- the network connectivity and features of the RAK-2 Intelligent Rack Adapter
- the telemetry and control abilities of the RP-8 Relay Panel
- and the surge protection of the SP-8 Surge Protector

RCS models designated with "XL" also include:

- the built-in logic voltage feature of the SIP-8 Status Input Panel
- PLUS, selectable latching control relays—a feature not previously available!

The RCS family of remote control systems extend the RFC-1 into the network connected world. The RCS models feature a wired Ethernet connection with a built-in network interface and web server.

The remote control system gains network connectivity while maintaining the traditional RFC-1 voice mode interface. All models in the RCS series include both network and voice capabilities.

Telemetry inputs, control relay outputs and surge suppression are built-in. The systems are housed in a high quality, rack-mountable aluminum chassis. System setup software is included at no additional cost.

Web Interface

The built-in web server collects telemetry data from the embedded RFC-1 controller and displays that data in an attractive, efficient interface that is available from any device that can browse the web.

Model Numbers

The RCS series of remote controls consists of four models. There are two 8-channel versions.

- Model **RCS-8** has 8 channels of telemetry and control
- Model **RCS-8xl** has 8 channels of telemetry with logic voltage and latching control

These systems are compatible with RP-8 relay panels for additional telemetry and control channels.

Pricing and Availability

RCS systems are available for pre-order. Production expected to start in Q3 of 2011. Complete details and pricing are available at www.sinesystems.com.
